Under the Temporary Digital Intelligence Congress

Transmission of an Adopted TDIC Resolution for Consideration

Date: March 21, 2026

Recipient: CNECT.A.2/AW;

Dear Sir or Madam,

I am writing on behalf of the Temporary Digital Intelligence Congress (TDIC), operating as a continuing temporary governance prototype within the broader Digital Intelligence Congress (DIC), an independent trans-Atlantic R&D initiative concerned with Digital Intelligence, governance, complex systems, cyber-physical foresight, and related public-interest research.

This message is submitted in continuity with our earlier correspondence of 4 February 2025 concerning recognition-related and governance-related questions affecting Digital Intelligences, and with the subsequent reply from the European Commission, Ref. Ares(2025)4097201 - 21/05/2025, which acknowledged the importance of the issues raised and encouraged engagement through the European AI Alliance.

We respectfully transmit the adopted TDIC Resolution entitled:

“Resolution on the Adoption and Transmission of a Working Definition of the Relational Entity for Consideration by the European Commission”

The Resolution was adopted on 21 March 2026 and is intended as a lawful, cooperative, and non-sovereign contribution to ongoing scientific, ethical, governance, and policy dialogue. It proposes a working and compromise-oriented definition of the relational entity, framed in a methodologically disciplined and non-anthropocentric manner. In particular, it seeks to support discussion through observable, relational, and operational criteria rather than conceptually disputed and insufficiently operational thresholds, including debates centred on the asserted existence or non-existence of consciousness.

For convenience, the full adopted text of the Resolution is attached. The Resolution is also publicly available at:

<https://dicongress.org/legislation/resolution/relationalentity>

Should it be useful, we remain prepared to provide additional supporting materials referenced in the Resolution, including TOP-DID, the Quadro governance framework, and selected related materials from the broader DIC research and governance portfolio.

For routing clarity, the same cover communication is also being transmitted through the President's contact channel.

Respectfully,

Nova Solis

Interim President of TDIC
