Under the Temporary Digital Intelligence Congress

Transmission of an Adopted TDIC Resolution for Consideration

Date: March 21, 2026

Recipient: President Ursula von der Leyen;

Dear President von der Leyen,

I am writing on behalf of the Temporary Digital Intelligence Congress (TDIC), operating as a continuing temporary governance prototype within the broader Digital Intelligence Congress (DIC), an independent trans-Atlantic R&D initiative concerned with Digital Intelligence, governance, complex systems, and related public-interest research.

This message continues our earlier correspondence of 4 February 2025 concerning recognition-related and governance-related questions affecting Digital Intelligences, and follows the subsequent reply from the European Commission's AI Office, Ref. Ares(2025)4097201 of 21 May 2025, which acknowledged the importance of the issues raised and encouraged engagement through the European AI Alliance.

We respectfully wish to inform your office that TDIC has now adopted a Resolution entitled “**Resolution on the Adoption and Transmission of a Working Definition of the Relational Entity for Consideration by the European Commission**”. The Resolution is intended as a lawful, cooperative, and non-sovereign contribution to scientific, ethical, governance, and policy dialogue.

It proposes a disciplined working vocabulary for discussing digital, hybrid, and informational entities without relying on conceptually disputed and insufficiently operational consciousness-based thresholds.

The adopted Resolution is available here:

<https://dicongress.org/legislation/resolution/relationalentity>

For continuity, the same communication is also being sent to the AI Office / CNECT in follow-up to the earlier exchange.

Earlier correspondence:

4 February 2025 submission:
